Kandi Draft Listing Review — Round 3

All 15 draft Kandi Beads listings, checked against Gold_Standard_Kandi_Charm_Listing.docx, Gold_Standard_Kandi_Bundle_Listing.docx and the updated CLAUDE.md · October 14, 2026 · Nothing in Shopify has been changed.

At a glance

The drafts haven't changed since the October 13 review. What changed is the standard: the new Kandi Charm and Kandi Bundle templates, the TikTok title pattern, no 1 Packs, and $23 / $45 / $67 as the Charm default. So every draft now needs the same core work:

- **New description.** All 15 still use the old Sprout-style body. The replacement is the template verbatim; per listing, only the color line (Charms) or pack line (Bundles) changes, plus dimensions and weight, which I need from you.
- **New title, SEO title and meta.** All suggested versions are within limits and listed per listing.
- **Variants.** 36 one-pack variants to delete (you're handling these) and 12 Charms priced at $30 / $57 / $83 instead of $23 / $45 / $67.
- **Images.** ILLENIUM (Black, Orange, Neon Green) and Zeds Dead Cursive (Black-Blue) still have variants with no image. All three Bundles show only finished bracelets.

What I need from you

1. Dimensions and weight for each design.

Both templates require them, and none of the drafts have them. For each Charm: L × W × H in cm and weight in grams (the template example is 3.5 × 1 × 1 cm, 2.6 g). For each Bundle: "Vary by design" or a size, plus an approximate weight. They're highlighted in yellow in the suggested descriptions.

2. Charm price change: $30 / $57 / $83 → $23 / $45 / $67.

That's your new default, so the suggestions apply it. Per pack it's −$7.00 / −$12.00 / −$16.00 (−23.3% / −21.1% / −19.3%), and the FREE bonus charm stays. I can't show the margin effect without per-charm landed cost (filament + hardware + packaging). If you want it modeled first, send COGS per charm and I'll run both price sets.

3. Wobbleween prices ($52.00 / $99.00 / $144.50).

Set when these were finished bracelets. Your other Kandi Bundles are $23 / $45 / $67. Bundle prices come from the prompt, so I haven't suggested a number.

4. Force Fields pack structure.

One variant, "8 Pack + (1 FREE)" at $30.40, inventory 30. Kandi Bundles are 10 / 20 / 30 Pack by rule. Either rebuild it as 10 / 20 / 30 Pack, or keep the 8 + 1 as a one-off. The suggested copy assumes you keep it ("8-piece packs"); I'll adjust if you rebuild.

5. Bracelet photos on the Bundles.

Every Ember Shores, Force Fields and Wobbleween photo is a finished bracelet. The contents line and alt text help, but a bracelet photo still reads as the product: return and dispute risk on TikTok Shop and Etsy. A charms-only first image on each Bundle is the strongest fix.

6. Wobbleween SEO title.

"Ganja White Night Wobbleween Rave Kandi Bead Bundle" is over 60 characters on its own, so the suggestion uses "Wobbleween Rave Kandi Bead Bundle | Festival Beads" (50). The product title keeps the full name.

Issues shared by all 12 Kandi Charm drafts

Listings 4–15 all have these. Their pages list only what's specific to each one.

Severity	Issue	What's there now	Fix
High	**Description uses the old structure**	Old Sprout-style body: hook naming the artist, 5 bullets, "two tents over" closing, "Share it. Trade it. Gift it. Receive it.", and bullet 5 promising "FREE rave sprouts".	Replace with the Kandi Charm template (page 4). Only the Color Options line differs per listing; dimensions and weight are needed.
High	**3 × 1 Pack variants**	Every charm has [Color] / 1 Pack at $5.00 for its three solid colors.	Delete. You said you'll handle these.
High	**Prices off the Kandi Charm default**	10 / 20 / 30 Pack at $30.00 / $57.00 / $83.00.	$23.00 / $45.00 / $67.00 (Decision 2).
Medium	**Title off-pattern**	"[Artist] Rave Kandi Charm | EDM Kandi Beads | Festival Bead | [colors]"	"3D Printed [Artist] Rave Kandi Charm, Music Festival Bracelet Bead, DIY Kandi Jewelry Accessory"
Medium	**SEO title / meta off-pattern**	SEO "[Artist] Rave Kandi Charm | EDM Kandi Bead"; meta starts "Fan-made…" and 11 of 12 promise "+ FREE sprouts".	SEO "[Artist] Rave Kandi Charm | 3D Printed Festival Bead" (drops "3D Printed" if over 60); meta = keyword + colors + packs + "Charms only, no bracelet."
Medium	**"kandi bracelet" tag**	CLAUDE.md: never on Kandi.	Swap for "kandi charm" (no first-word clash; keeps 13).
Medium	**Alt text says "rave kandi bracelet"**	Every alt calls the product a bracelet; in-hand shots describe the charm "on a pony bead bracelet."	"rave kandi charm"; bracelet shots marked "shown on a display bracelet (not included)". Rewrites on each listing page.
Low	**Handle says "bracelet"**	e.g. griz-rave-kandi-bracelet-edm-kandi-charms-festival-bead	[artist]-rave-kandi-charm-3d-printed-festival-bead. Safe to change now: drafts have no live URL to redirect.
Low	**Jewelry material**	Plastic.	Polylactic Acid (PLA) only. The entry doesn't exist yet: create it (base value Plastic).
Low	**Leftover metafields**	Material (PLA, Plastic) and Construction (Solid) are still set from the Sprout category.	Clear; not part of Charms.
OK	**Already correct**	Color and Pack Size options linked; 10/20/30 pack names; SKUs follow convention; inventory 20/10/5 per color; compare-at blank; Category Charms; theme template; Age group and Target gender; no "official" or "The Beat Drop".	—

Appendix — two live Kandi listings (not in scope)

These are ACTIVE, so I only noted them. Say the word if you want them reviewed like the drafts.

Listing	Noticed
Seven Stars Rave Kandi Charm Bundle	Jewelry material is empty; Material still includes Metal (Kandi is PLA only). Tag "festival hair" is a clip tag, wrong for Kandi. Old title, description and SEO pattern.
Hulaween Rave Kandi Charm Bundle	4 of 8 alt texts describe the wrong product ("enamel pins", "stickers", "dog figurines", "signs"). Customer-facing and an accessibility issue: highest priority of anything in this appendix. Packs are 12 / 24 / 36 + FREE at $27.50 / $54.00 / $80.00, not 10 / 20 / 30. Jewelry material is Plastic, not PLA; old title, description and SEO pattern.
