Kandi Draft Listing Updates — Round 4

Your answers to the Round 3 review applied to all 15 Kandi Beads drafts · October 15, 2026 · Nothing in Shopify has been changed yet.

Your decisions, applied

#	Your answer	What changes
1	Dimensions and weight: left blank	**Still needed. Slots stay highlighted in every description.**
2	Charms at $23 / $45 / $67, 10/20/30 Pack + FREE	All 12 Charm drafts repriced from $30 / $57 / $83. You're deleting the 1 Packs.
3	Wobbleween priced with the same uplift as Wobbleween Sprouts	$41.00 / $79.50 / $118.00 (math below), down from the bracelet-era $52.00 / $99.00 / $144.50.
4	Force Fields follows the Kandi Bundle rule	Rebuilt as 10 / 20 / 30 Pack + FREE at $23 / $45 / $67, inventory 100 / 50 / 30. Title, meta and description updated to match. Price is my assumption: confirm.
5	Alt text: current vs. fix where it doesn't fit	91 of 91 draft images need a change (table per listing), plus 8 on the live Hulaween listing (appendix). See the note below on how this was checked.
6	SEO titles and meta within limits	All 15 below: every SEO title ≤ 60, every meta ≤ 160.

Wobbleween price uplift

Method: take the Wobbleween Sprout ÷ standard Sprout ratio at each pack size, apply it to the standard Kandi Charm price at the same pack size, then round to the nearest $0.50 (your pricing convention).

Pack	Std Sprout	WW Sprout	Uplift	Std Kandi	Kandi × uplift	Proposed
10 + 1	$28.00	$50.00	1.7857 (+78.57%)	$23.00	$41.07	**$41.00**
20 + 2	$55.00	$97.00	1.7636 (+76.36%)	$45.00	$79.36	**$79.50**
30 + 3	$81.00	$142.50	1.7593 (+75.93%)	$67.00	$117.87	**$118.00**

- **Formula:** Proposed = MROUND(Std Kandi × WW Sprout ÷ Std Sprout, 0.50). Example, 10 Pack: 23 × 50 ÷ 28 = 41.07 → $41.00.
- **Excel / Google Sheets (same syntax in both): =MROUND(E2*C2/B2,0.5)** with Std Sprout in B, WW Sprout in C, Std Kandi in E.
- **Volume discount holds:** $4.100 → $3.975 → $3.933 per paid charm.
- **Check:** one blended uplift (total WW ÷ total standard = 1.7652) gives $40.50 / $79.50 / $118.50 instead. Per-tier matches your Sprout ratios exactly, so that's what I used.
- **Not modeled:** margin against your 40% target. The Wobbleween designs cost more to print, and I don't have their per-charm landed cost. Run these through the pricing calculator before they go live.

SEO titles and meta descriptions

SEO title ≤ 60 · meta ≤ 160. Charm SEO titles drop "3D Printed" only where it would push past 60; all three Bundle SEO titles need that, so they end "| Festival Beads".

Alt text: how I checked it

I couldn't look at the photos themselves. Shopify Admin and the Shopify image CDN are both blocked in the browser pane's site permissions, the Shopify connection dropped during this round, and IMGs/ only holds the Griz Bones files. Instead I checked each alt text against its filename, the variant it's linked to, and the listing. That catches wrong product words, bracelet implications, generic auto-descriptions and color mismatches. It can't catch an alt that describes the wrong photo.

- **48** only need "bracelet" → "charm".
- **26** show a bracelet and need "shown on a display bracelet (not included)" (Bundles and in-hand Charm shots).
- **8** on Ember Shores are generic auto-generated photo descriptions that sell the bracelet; rewritten.
- **9** are blank (7 ILLENIUM, 2 Zeds Dead Cursive) and need the photo.
- **2 variant-image mismatches:** Griz and Pretty Lights Multicolor variants point at an in-hand bracelet shot rather than the three-color photo.

For a true photo-vs-text check, drop the listing photos into IMGs/ (or allow cdn.shopify.com for the browser pane) and I'll look at every one.

Still needed from you

- Dimensions (L × W × H cm) and weight (g) for each Charm design; "Vary by design" or a size, plus approximate weight, for each Bundle.
- Confirm Force Fields at $23 / $45 / $67.
- Photos for ILLENIUM (Black, Orange, Neon Green) and Zeds Dead Cursive (Black-Blue), and the 9 blank-alt images.
- Delete the 36 Charm 1 Pack variants (yours).
